EDUCATION

Bachelor of Systems and Digital Media - Federal University of Ceará (2019)

Postgraduate in Full Stack Web Development DevOps applied to Product and Artificial Intelligence – Rocketseat College of Technology (2026)

PROFESSIONAL EXPERIENCE

Front-end Developer (01/2026 - 12/2026 - Now)

Company: Instituto de Pesquisas Eldorado

- Developed and integrated independently deployable modules within a microfrontend architecture across cross-team frontend applications, improving scalability, deployment independence, and team collaboration.
- Reduced front-end rework by ~15% by contributing to the evolution of a shared design system through proposing enhancements, reporting component issues, and collaborating via Storybook, improving component consistency and maintainability.
- Reduced implementation rework by ~20% by partnering with product managers and designers to translate business requirements into well-documented technical solutions through early technical alignment, improving delivery efficiency and cross-functional collaboration.
- Achieved ~90% test coverage for critical components by implementing unit tests with Vitest and React Testing Library, reducing regression-related defects and increasing release reliability.
- Managed Git workflows using Azure Repos, including branching strategies, pull request reviews, and merge conflict resolution, improving release reliability and reducing integration issues across development teams.

Technologies: react, next, zustand, web components, vitest, javascript, typescript, jquery, html, css, sass, husky, storybook, figma, husky, storybook, microfrontends, axios, tanstack query, azure, bitbucket, jira, git, spec-driven-development, open code, open specs, mcp, virtual machine

Front-end Developer (07/2025 - 12/2025)**Company: SENAI Ceará (National Service of Industrial Learning)**

- Led the end-to-end development of a no-code SCORM course generator platform by gathering requirements with stakeholders, designing the product and UX, and implementing AI-powered course generation, reusable learning components, and SCORM/PDF export, enabling instructional designers to create and distribute courses more efficiently across LMS platforms.
- Reduced course production time by ~70% and content production costs by around 50% by developing reusable components and templates aligned with SENAI's instructional methodology and implementing AI-powered course generation from uploaded lesson documents, standardizing course creation while ensuring consistency with the organization's methodology, visual identity, and layout standards.
- Increased course completion rates by ~15% by delivering responsive, AI-generated courses with a modern, consistent UI, SCORM compatibility, mobile optimization, and PDF export, improving learner engagement, accessibility, and the overall learning experience.

Technologies: react, next, javascript, typescript, html, css, tailwind css, axios, git**Front-end Developer - (07/2023 - 06/2025)****Company: Data Stone**

- Reduced development time for new features by ~30% by refactoring a legacy application, migrating a fragmented codebase (HTML, Bootstrap, Vue, and Django templates) to a modern component-based architecture, and applying design patterns, code standardization, and UI/UX improvements, reducing technical debt and improving maintainability.
- Reduced average page load times by ~40% by developing the frontend for two SaaS platforms and implementing a hybrid SSR + CSR rendering strategy, caching, and lazy loading, improving application responsiveness and user experience.
- Reduced support tickets by ~35% by redesigning the user experience and simplifying critical workflows, minimizing incorrect error reports from non-technical users and improving task completion efficiency.
- Reduced regression-related bugs by ~30% by implementing secure authentication flows, token refresh handling, API request validation, and introducing unit and integration testing practices, strengthening application security and increasing confidence in production releases.

Technologies: vue, vuetify, vuex, pinia, nuxt, javascript, typescript, html, css, docker, vitest, axios, tanstack query, git, bitbucket

Front-end Developer - (06/2022 - 06/2023)

Company: WMC Technology

- Reduced implementation time for new features by ~25% by developing and maintaining the frontend with modular and reusable components, improving code consistency and maintainability across the project.
- Accelerated feature delivery by collaborating on the development of new pages and features while ensuring visual consistency and alignment with business requirements, delivering a more cohesive user experience.
- Improved perceived application responsiveness by ~20% by integrating REST and GraphQL APIs and optimizing data fetching and state management, reducing unnecessary network requests and enhancing performance.
- Reduced UI-related defects by applying clean code principles, refactoring CSS into reusable patterns, and standardizing styling, simplifying long-term maintenance and improving code quality.

Technologies: vue, vuetify, vuex, javascript, typescript, html, css, docker, axios, git, virtual machine

Front-end Developer (04/2020 - 05/2022)

Company: SENAI Ceará (National Service of Industrial Learning)

- Reduced average page load times by ~40% by modernizing digital learning platforms, replacing outdated, non-responsive systems with accessible, scalable, and mobile-friendly solutions using modern frontend technologies, significantly improving the overall user experience.
- Reduced student dropout rates by ~20% and increased course completion rates by ~15% by designing interactive prototypes, new features, and gamification elements in Figma, making courses more engaging, intuitive, and accessible across devices.

Technologies: vue, vuetify, vuex, javascript, typescript, jquery, html, css, tailwind css, figma, scorm, axios

Motion Designer - (11/2018 - 02/2020)

Company: IEPRO (Institute of Studies, Research, and Projects of UECE)

- Delivered ~100 multimedia assets by producing motion graphics and video content for educational lessons and institutional communications using Adobe After Effects and Premiere Pro, supporting digital learning initiatives

with engaging visual content.

- Increased learner engagement by ~15% by collaborating with content creators and instructional designers to transform complex concepts into clear, engaging animations, improving the overall learning experience.

Web Designer - (01/2016 - 10/2018 - Full-time)

Company: FCPC (Ceará Research and Culture Foundation)

- Reduced average content update time by ~40% by leading the design, development, and maintenance of institutional news portals using WordPress, Joomla, HTML, and CSS, improving content publishing workflows and operational efficiency.
- Reduced design rework by ~30% by defining and evolving the visual identity of new educational courses through stakeholder collaboration, interactive prototyping, and iterative validation, delivering a more consistent and user-centered experience.
- Accelerated feature delivery by ~20% by acting as the communication bridge between stakeholders and the development and design teams, improving requirement alignment and reducing delivery bottlenecks.
- Accelerated intern productivity by providing onboarding, technical guidance, and code/design reviews, helping them become independent contributors more quickly.

Technologies: html, css, javascript, wordpress, joomla, photoshop, illustrator, indesign, after effects

Web Designer - (01/2012 - 12/2015 - Part-time)

Company: FCPC (Ceará Research and Culture Foundation)

- Reduced publishing time by ~30% by designing and maintaining institutional news portals using WordPress, Joomla, HTML, and CSS, improving content accessibility and streamlining content management workflows.
- Increased learner engagement by ~15% by developing interactive learning resources with Adobe Flash and ActionScript for distance education courses, creating more engaging educational experiences.
- Reduced content production time by ~20% by producing digital publications and visual materials, including eBooks, with Adobe Photoshop, Illustrator, and InDesign while creating reusable design assets and templates, ensuring consistent branding and improving production efficiency.

Technologies: html, css, wordpress, joomla, photoshop, illustrator, indesign, flash, actionscript

Web Designer - (07/2010- 12/2011 - Intern)**Company: FCPC (Ceará Research and Culture Foundation)**

- Developed interactive learning resources using Adobe Flash and ActionScript for distance education courses, supporting learner engagement through interactive online educational content.
- Created digital design materials, including images and illustrations, using Adobe Photoshop and Illustrator, supporting the production of consistent and engaging educational content.

Technologies: html, css, photoshop, illustrator, flash, actionscript**LANGUAGES**
